Professional Summary

Senior Software Architect with **8+ years** designing and shipping systems across mobile (iOS, Android, Flutter), backend (Go, Node) and cloud (AWS). Currently Senior Mobile Engineer at **PayPal/Venmo**, delivering financial features for 426M+ users with an **"Exceeds Expectations"** performance rating. Founder and CEO of **Capdesis**, a Mexico-based consultancy: 34+ projects delivered, 51,000+ students reached, 97% client satisfaction, team of 4 to 6 engineers. Target roles: Staff / Principal Mobile Engineer, Mobile Architect, Cloud Architect, Security Architect, Tech Lead, Fractional CTO. Deep expertise in Clean Architecture, multi-module systems, OAuth 2.0, biometric authentication, OWASP MASVS and threat modeling. Actively pursuing AWS Solutions Architect Professional and advanced cybersecurity certifications. Instructor to 54,000+ developers on Udemy.

Technical Skills

- **Mobile Native:** iOS (Swift, SwiftUI, UIKit, Combine, Core Data, CoreLocation), Android (Kotlin, Jetpack Compose, Android SDK, Coroutines, Flow, Room)
- **Mobile Cross-platform:** Flutter, Dart, BLoC, Riverpod, Provider, GetX, React Native
- **Backend & APIs:** Go (Golang), Python, Node.js, REST, GraphQL, gRPC, microservices, event-driven architecture, Kafka, Redis
- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, Lambda, CloudFront, IAM), GCP, Firebase, Docker, Kubernetes, Terraform, Hostinger, Tailscale
- **Architecture:** Clean Architecture, MVVM, MVI, Multi-module, Repository Pattern, SOLID, Domain-Driven Design (DDD), Hexagonal, High-Level Design (HLD), observability, SRE practices
- **Security:** OAuth 2.0, OpenID Connect, JWT, biometric auth (Face ID, Touch ID, Fingerprint), Keychain, Android Keystore, Secure Enclave, Certificate Pinning, App Attest, Play Integrity, SafetyNet, mTLS, threat modeling, OWASP MASVS, OWASP MASTG, OWASP Top 10
- **Compliance:** PCI DSS awareness, SOC 2 controls familiarity, GDPR, accessibility (VoiceOver, TalkBack, WCAG 2.1)
- **Testing & Quality:** JUnit, Mockito, Espresso, XCTest, Flutter Test, UI and automation testing, 85%+ coverage on production code, contract testing, load testing

- **DevOps & CI/CD:** GitHub Actions, GitLab CI, Jenkins, Fastlane, Bitrise, Datadog, Sentry, Grafana, Prometheus
- **State & Reactive:** Kotlin Flows, Combine, RxJava, RxSwift, LiveData
- **Databases:** PostgreSQL, MySQL, SQLite, Firebase Firestore, Redis, DynamoDB
- **Feature Management:** Feature Flags, remote config, A/B testing, fake responses, controlled rollouts
- **Tooling:** Git, Linux (Arch), macOS, Neovim, tmux, Android Studio, Xcode, Figma, AI pair programming (Claude, Cursor)
- **Languages:** Spanish (Native), English (C1 Professional)

> **Architecture & Security focus.** I design systems, not just features. My HLDs cover authentication flows, data boundaries, failure modes, observability and threat models, not just the happy path. Currently preparing AWS Solutions Architect Professional and OSCP / AWS Security Specialty.

Professional Experience

Senior Mobile Engineer, PayPal / Venmo

May 2024 to Present | Remote | Fintech (consumer payments)

Shipping financial features for 426M+ users. Performance rating: Exceeds Expectations.

- Author High-Level Designs (HLDs) for Push Provisioning, Auth Users and other security-critical features
- Led Push Provisioning implementation in Kotlin and Swift: credit card addition to Apple Wallet and Google Pay
- Architected Auth Users (6 users per card) with a complete refactor to Clean Architecture, including authorization rules and audit logging
- Implemented biometric authentication (Face ID, Touch ID, Fingerprint) for secure card management flows
- Ship features 50 / 50 on Android and iOS in the same release cycle; maintain 85%+ unit and UI test coverage
- Delivered Feature Flags and deterministic Fake Responses infrastructure for controlled rollouts and integration testing
- Improved accessibility compliance (VoiceOver, TalkBack, dynamic type) across the owned feature set
- Mentor 2 to 5 engineers on mobile best practices, code reviews, testing strategy and architecture decisions

Tools: Kotlin, Swift, Jetpack Compose, SwiftUI, Kotlin Flows, Combine, GraphQL, OAuth 2.0, JWT, Biometrics, Feature Flags, Datadog, GitHub Actions

Founder & CEO, Capdesis

Jan 2019 to Present | Mexico City, Mexico | EdTech & Consulting

Founded a software studio: 34+ projects delivered, 51,000+ students reached, 97% client satisfaction.

- Lead a team of 4 to 6 engineers shipping Flutter apps, Go backends and web for clients across Mexico and the US
- **IngenieriaTracker** (10,000+ MAU): offline-first Flutter client with Go backend, 22+ APIs, 66% latency reduction after database migration
- **Formulae Pro and Community** (40,000+ users): math and chemistry learning platform with ChatGPT integration
- **CapMenu, Cap Living, Lo Mas Fresh, CapTienda**: restaurant, property, marketplace and POS mobile applications
- Web projects delivered for Leon Entertainment, OPUS Asesores, Artipublimex, Ancare (Analogic Care) and Apiario Xun-kaab; additional work completed for Banco Multiva, Scotiabank, Hospital Angeles
- Strategic direction, technical advisory, hiring, and team structure; mentored 20+ developers through courses and internal workshops
- Fractional CTO engagements: architecture reviews, security audits, performance audits, cloud cost optimization

Tools: Flutter, Dart, BLoC, Riverpod, Go, Python, Firebase, RevenueCat, Docker, AWS, PostgreSQL

Senior Native Mobile Developer, Tienda UNAM

Sep 2022 to Apr 2024 | Mexico City, Hybrid | E-commerce

Modernized the university commerce platform serving thousands of students and staff.

- Integrated AI-powered chat via OpenAI API for customer support automation
- Optimized QR scanning, **3x faster** with Kotlin coroutines and camera pipeline tuning
- Implemented Universal Links (iOS) and App Links (Android) for deep linking across web and mobile
- Redesigned UX with Figma and a design system, driving **+40% engagement**
- Built companion web application; owned full App Store and Play Store release cycle end to end

Tools: Kotlin, Swift, SwiftUI, Jetpack Compose, OpenAI API, CoreLocation, Firebase

Senior Backend Engineer, Flexera

Jan 2022 to Aug 2022 | Remote | Enterprise SaaS

Monolith to microservices migration with Go, Kubernetes and AWS.

- Led database migration improving query performance and reliability
- Built CI/CD pipelines with GitLab CI, Jenkins and GitHub Actions
- Implemented Kafka and Redis for real-time streaming and caching

Tools: Go, Kubernetes, AWS (S3, EC2, RDS), PostgreSQL, MySQL, Docker, Terraform, Kafka, Redis

Mobile Developer & Project Lead, iOS Development Lab, UNAM

Jan 2020 to Dec 2021 | Mexico City | Education

- Developed iOS and Flutter applications for university geolocation and navigation
- Led team of developers; honorable mentions at multiple hackathons
- Implemented GitHub Actions CI/CD for automated testing and deployment

Tools: Swift, Flutter, Dart, MySQL, iOS SDK, CoreLocation

Senior Instructor, Udemy

Jan 2020 to Dec 2023 | Remote | Online Education

- Created 6 courses (C, C++, Kotlin, Git and GitHub) educating **54,000+ developers** worldwide
- Maintained high engagement with practical projects, assessments and regularly updated content

Project Manager, Audiovisuell

Jan 2018 to Dec 2019 | Mexico City | Media

- Managed audiovisual projects, brand experiences and educational content
- Led cross-functional teams and coordinated multi-stakeholder deliverables

Education

Bachelor of Science in Computer Engineering

Facultad de Ingenieria, Universidad Nacional Autonoma de Mexico (UNAM), Mexico City

Certifications

- Google Play Store Listing Certificate, Google Play Academy (2026)
- Google Developer
- Meta Developer
- Mobile Architecture
- AWS Solutions Architect, Professional (in progress)
- AWS Security, Specialty (in progress)
- CISSP, ISC2 (in progress)
- Meta iOS Developer, Professional (in progress)
- Meta Android Developer, Professional (in progress)
- AWS DevOps Engineer, Professional (on the roadmap)
- AWS Generative AI Developer, Professional (on the roadmap)
- ISSAP, ISC2 (on the roadmap)

Projects & Leadership

- **Open Source:** OmniMon macOS system monitor (contributor); ubuntu2kali installer tooling; openai-kotlin Kotlin client; Neovim-Vim_Configuration; 60+ public repositories at github.com/chochy2001
- **Speaking:** Tech conferences at UNAM, multiple hackathons (honorable mentions), industry webinars
- **Personal projects:** Home automation IoT, ARKit prototypes, open source developer tooling
- **Leadership:** Founded and scaled Capdesis from solo founder to a team of 4-6 engineers; mentored 20+ engineers; hands-on hiring and team structure
